FOOD & BEVERAGE EXPERIENCES

Presentation, Quality & Less is More

One of the largest expenses that bridal couples face is food and beverage. Catering companies have large overhead costs and staffing. In addition, most companies make their profit margins inside alcohol packages. We try to streamline the entire process in BeSpoke weddings. We know that people love good food, beautiful presentation and attentive staff. We deliver all of the above but strip away the need for large amounts of prep by offering streamlined food experiences.

Our food experiences don't require sit down dining but rather a cocktail experience so that your guests mix, mingle and you reduce the need for specific seating, expensive tablescapes, place settings for each guest and extra staff.

Guests are given customization options inside each experience so they can find the food that meets their dietary restrictions and preference.

We melt experience with nostalgia without the price tag.

Our food is beautifully presented, made with quality ingredients and will be sure to satisfy.
